

Atlas

Product Heist 2025

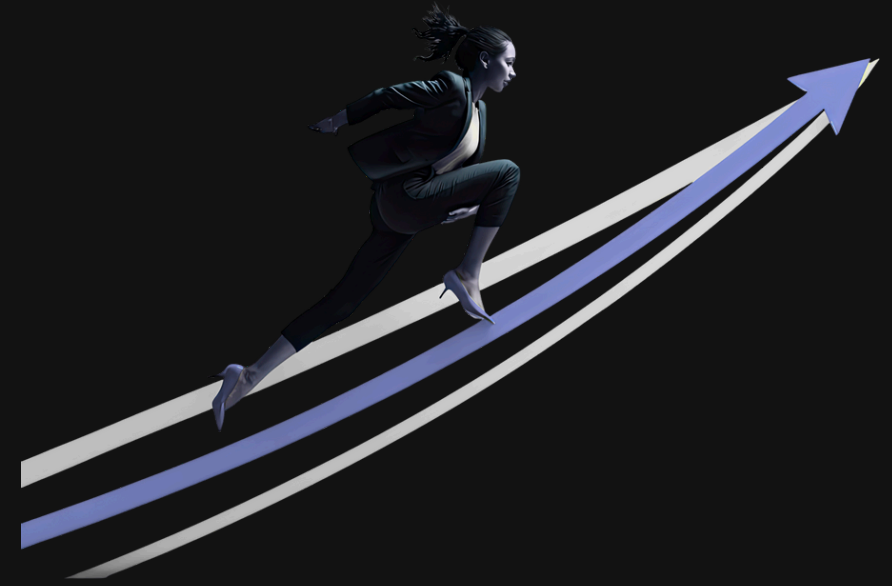

The way Venture Capital Firms operate *is broken.*

Teams spend more time *managing information* than *making decisions.*

These *three signals* reveal the *true trajectory* of a startup.

Revenue Growth

Shows real market pull and validates that customers are willing to pay— the strongest indicator of early product-market fit.

Total Users Acquired

Captures adoption momentum and demand velocity, especially in the early stages before revenue fully develops.

Founders' Inter-relationships

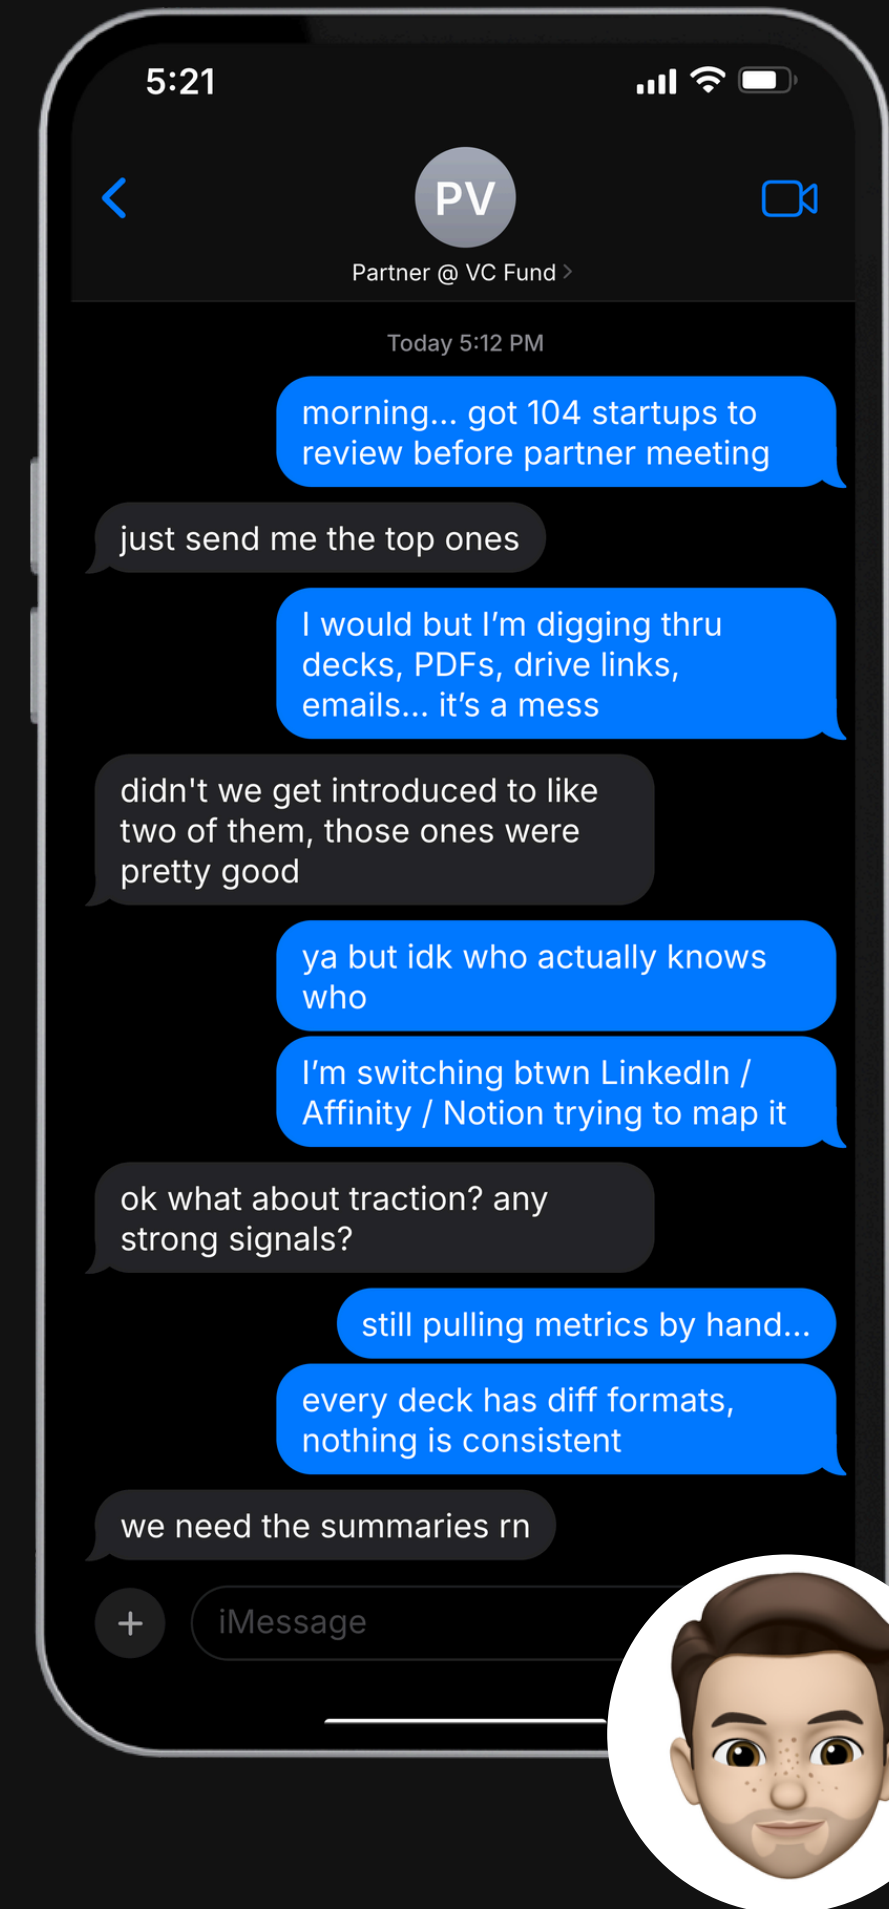

Reveals credibility, access, warm paths, and execution advantage — the network layer that often determines whether a company can scale.

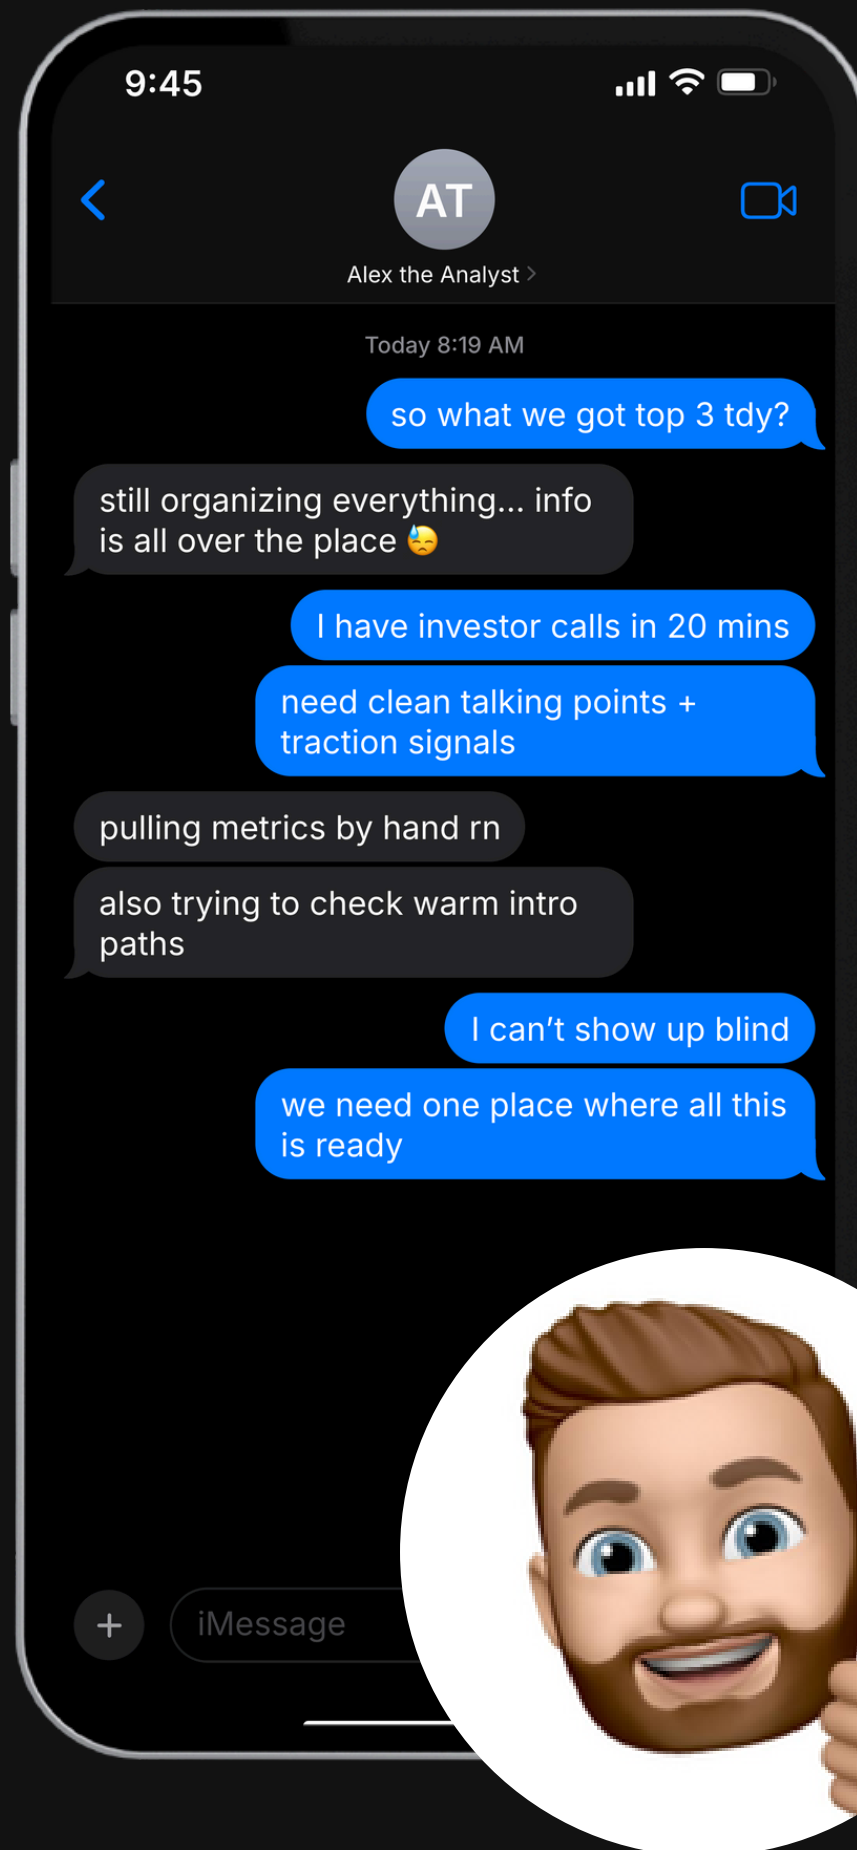

Meet **Alex**, a **26-year-old** overwhelmed analyst, struggling to deal with **so much data**

Alex's Day @ A Glance

8:00AM	Inbox: 47 new pitch decks
9:00AM	Manually extract metrics from PDFs
11:00AM	Research founders on LinkedIn
12:00PM	Email asking "Who knows this CEO?"
2:00PM	Build investment memo from scratch
5:00PM	Onto the next startup

- Spends more time **sifting through documents** than analyzing them
- Never knows if there's **any connection to founders** previously
- Takes **4+ hours** writing one memo

Meet **James**, a **42-year-old partner** stretched thin, trying to stay on top of relationships and decisions

What James is Responsible For

- managing LP + founder relationships
- making fast, high-conviction investment decisions
- representing the fund in calls, meetings, and deal flow conversations

Where James Struggles

- information scattered across emails, drives, and message threads
- no clear visibility into warm intros or relationship paths
- inconsistent summaries → shows up to calls without full context

Lacks clear, consistent context before every call

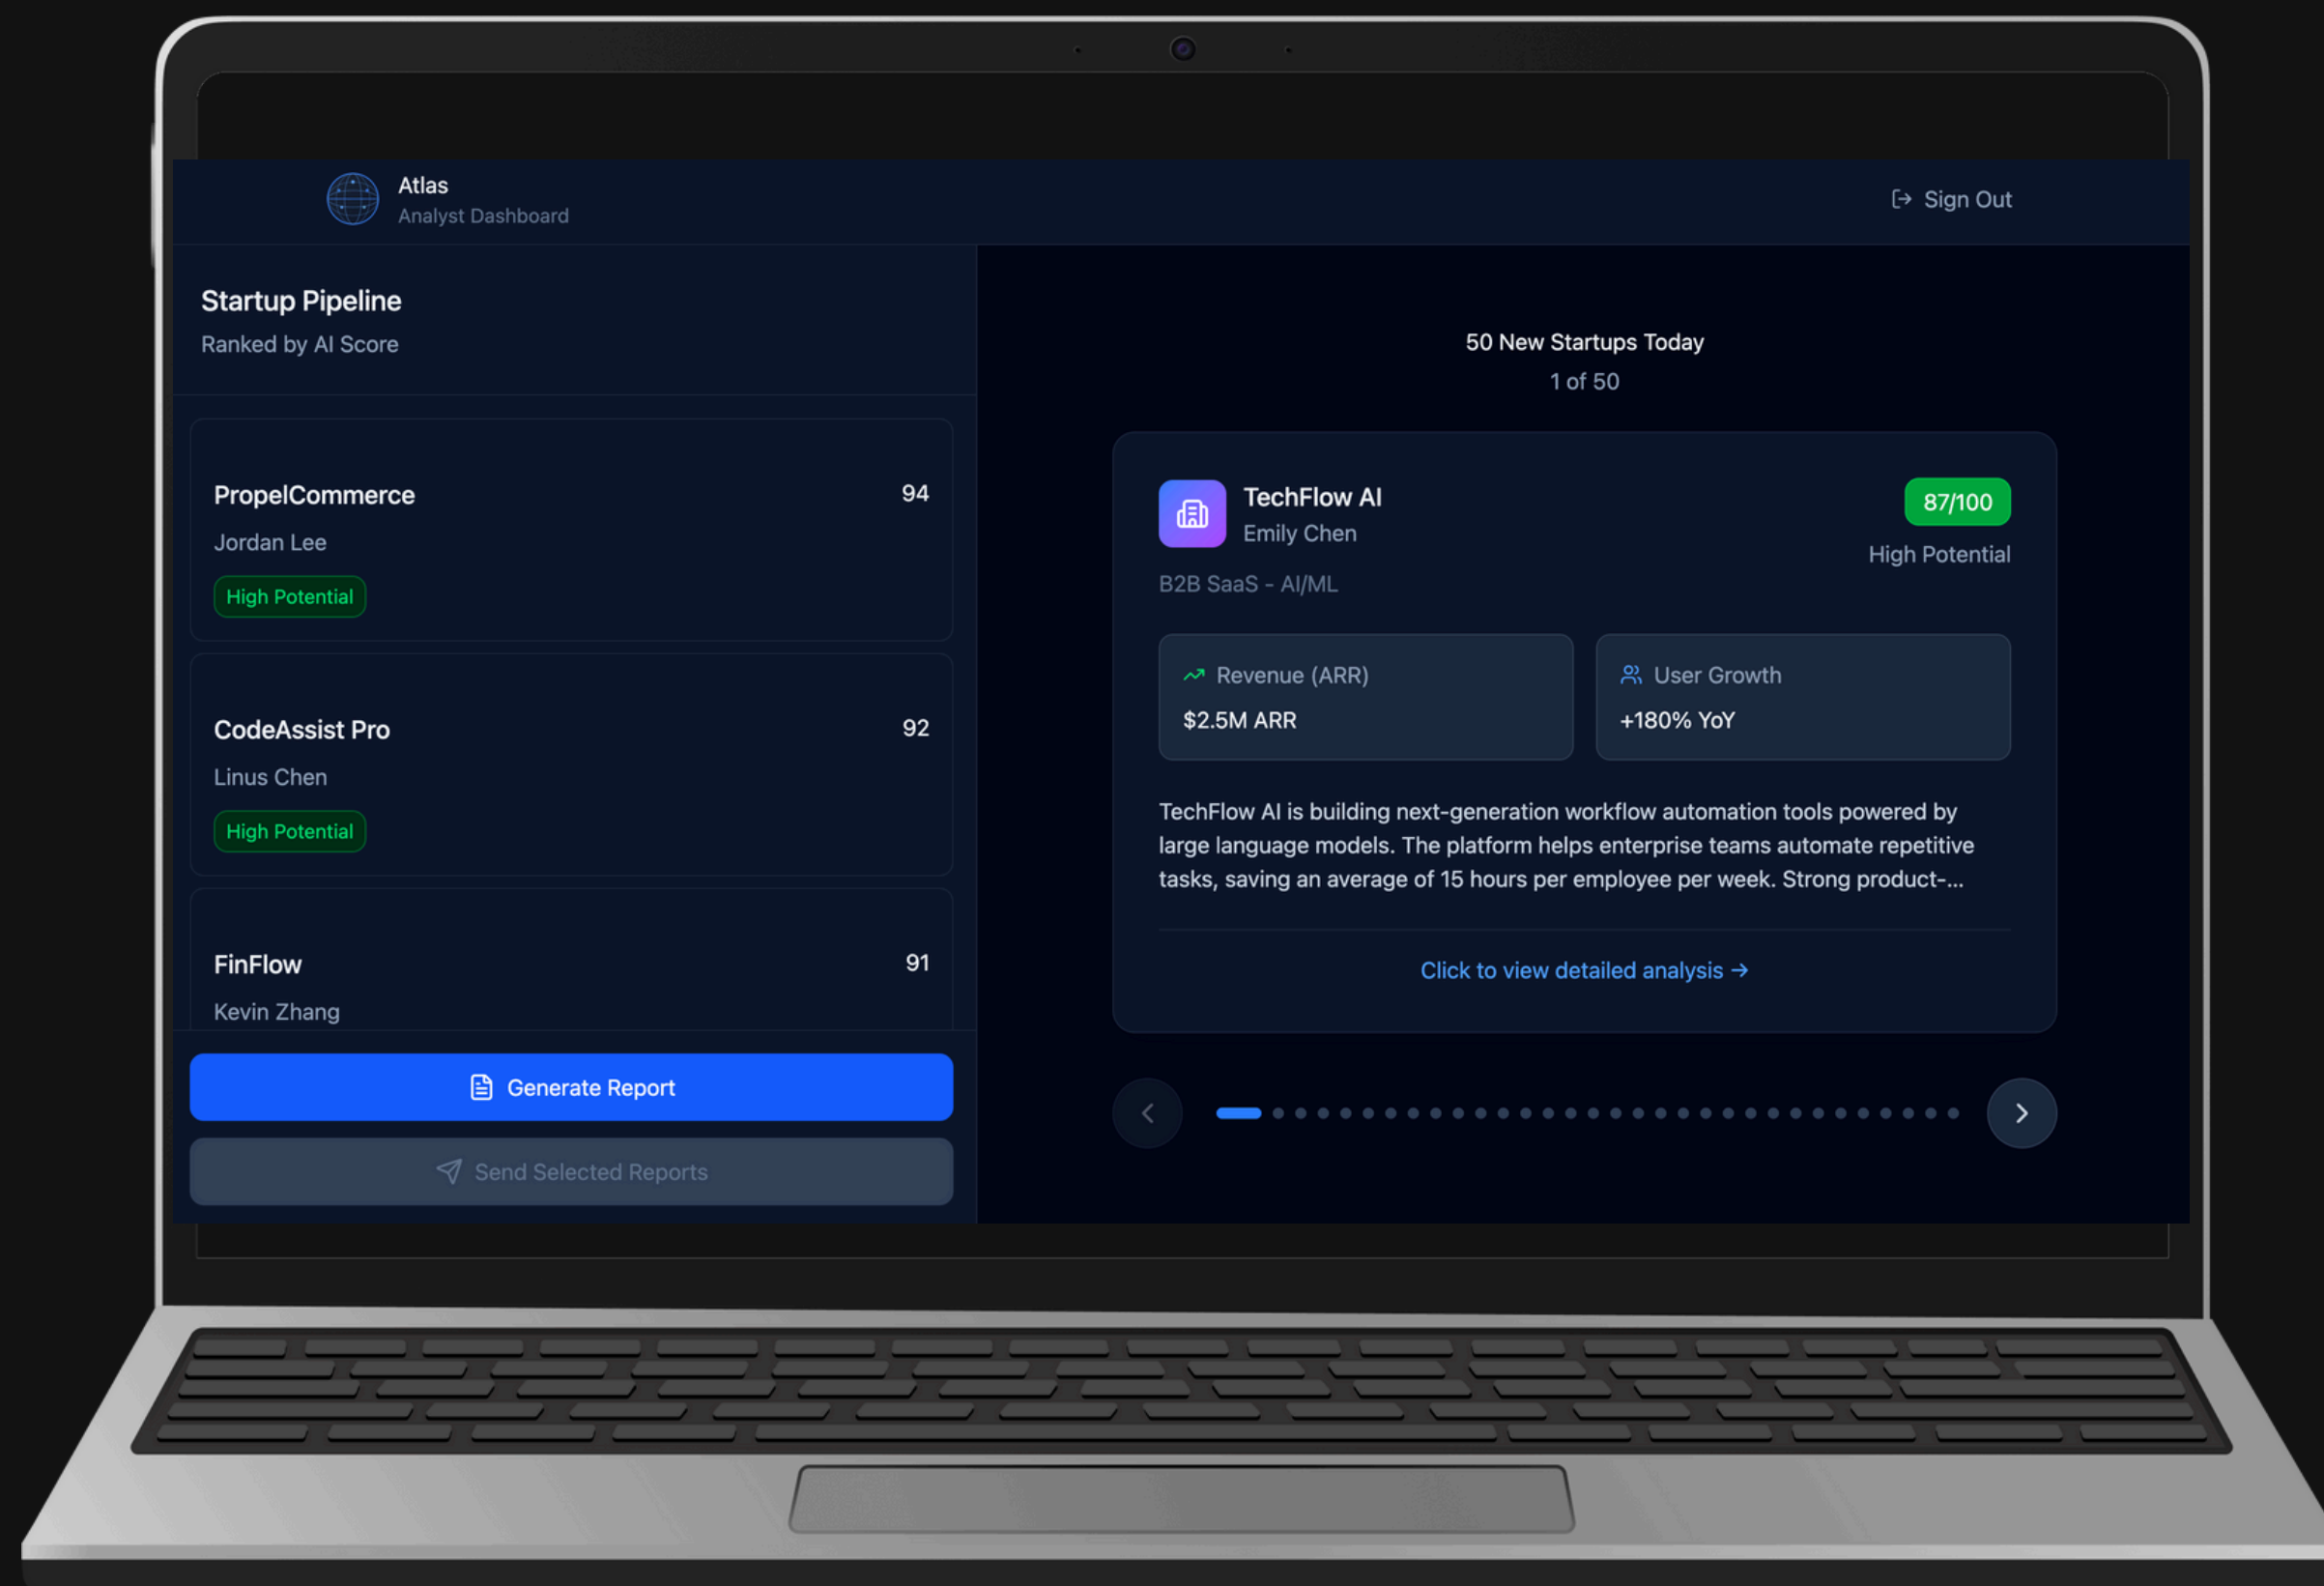

Relationship visibility is fragmented and hard to access

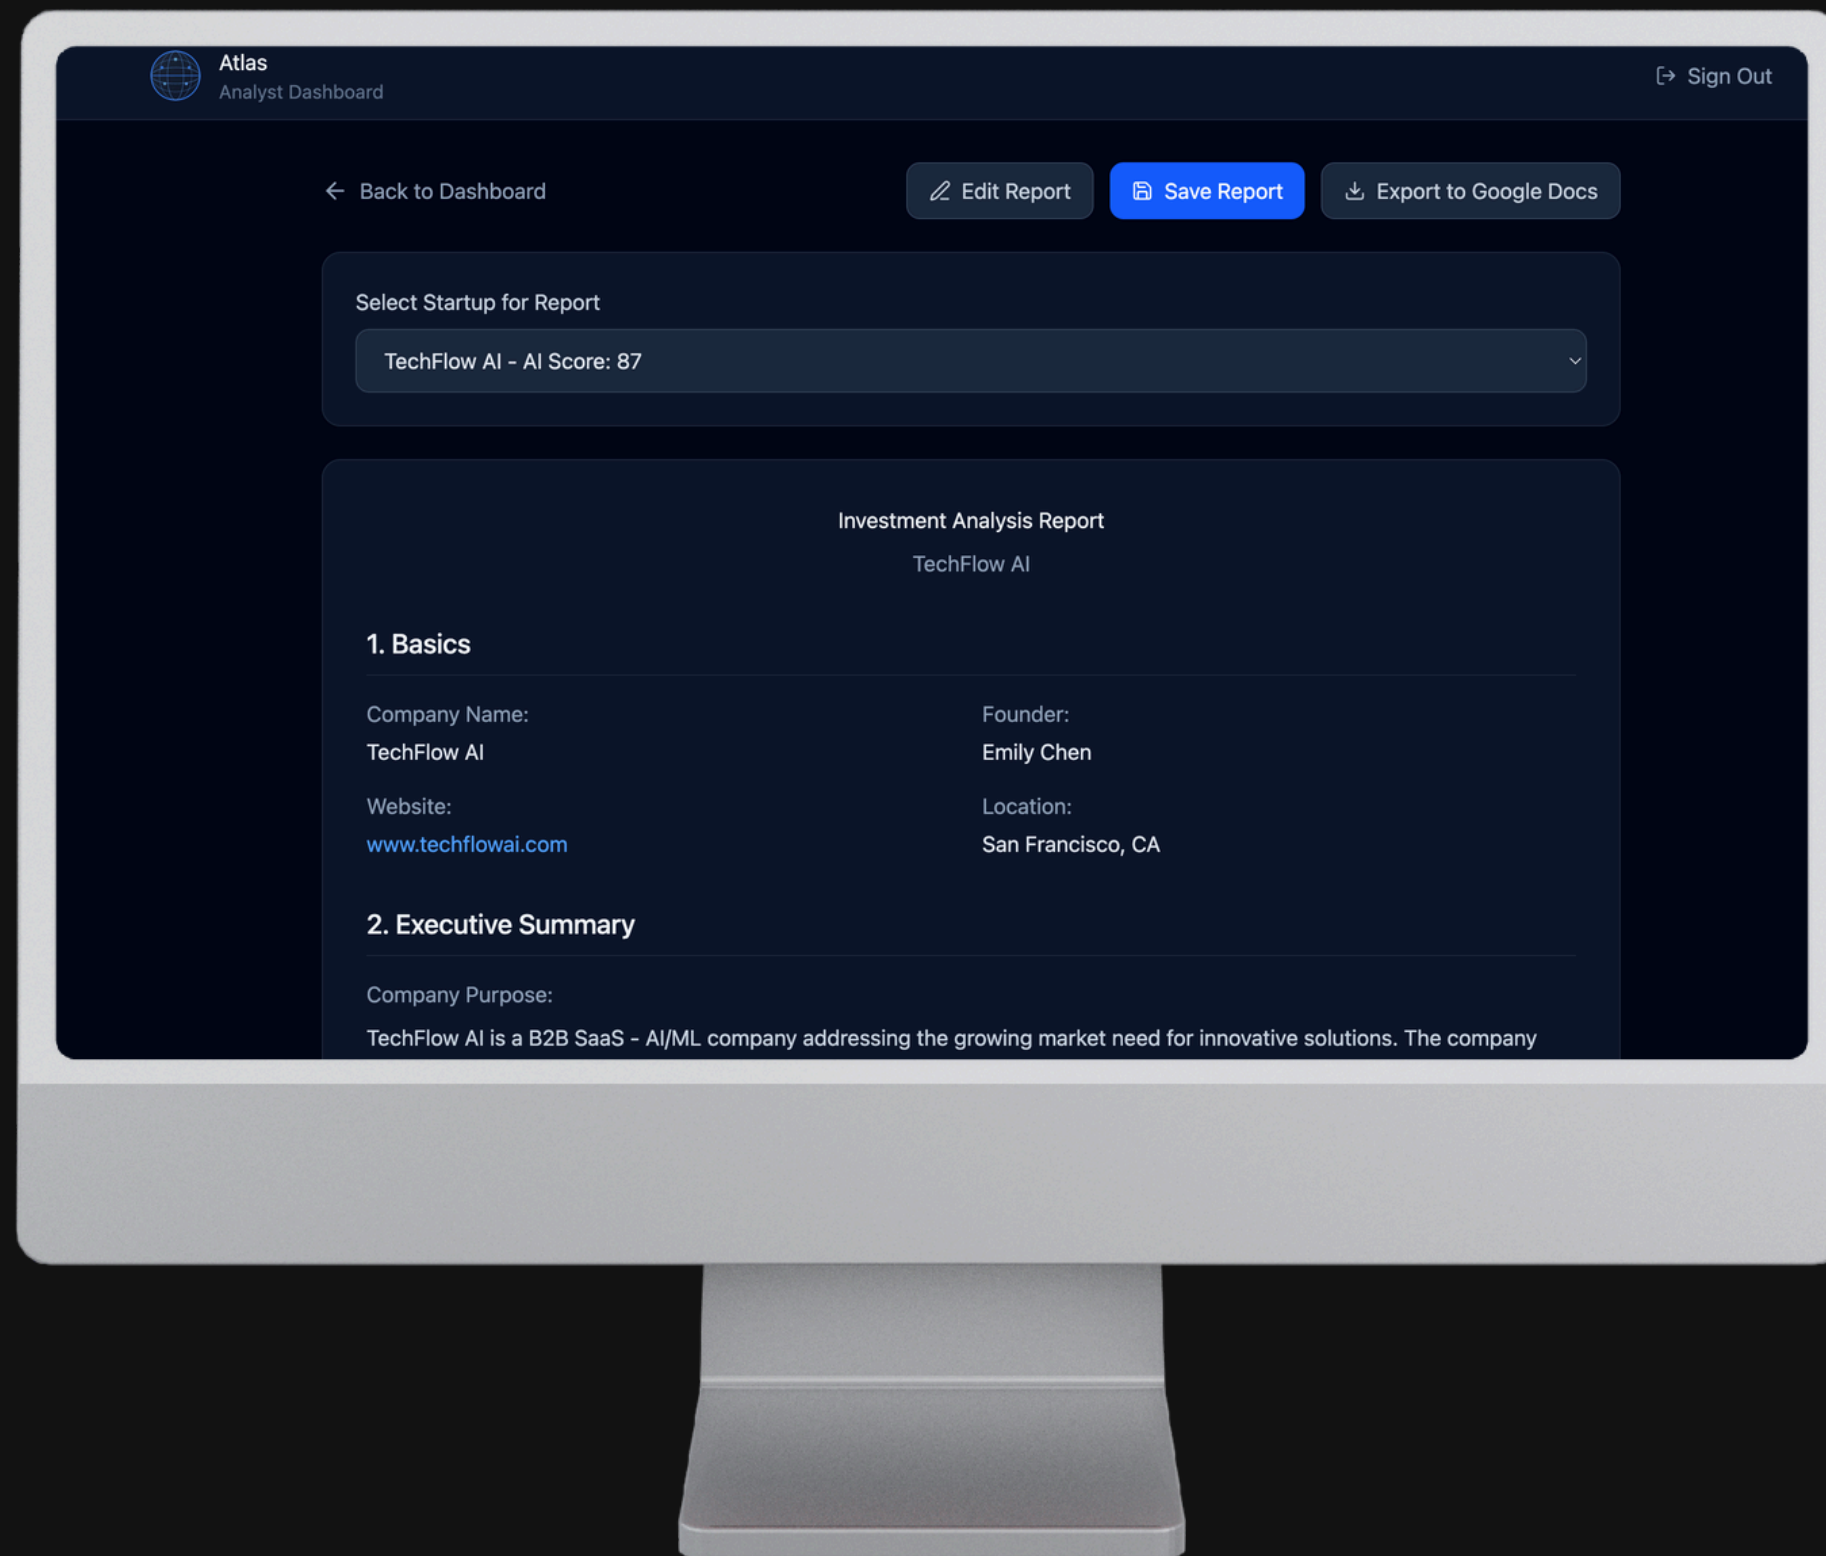

introducing...

Atlas

the operating system
that lets venture teams
focus on the **work that
actually matters.**

From the desktop of an **analyst**...

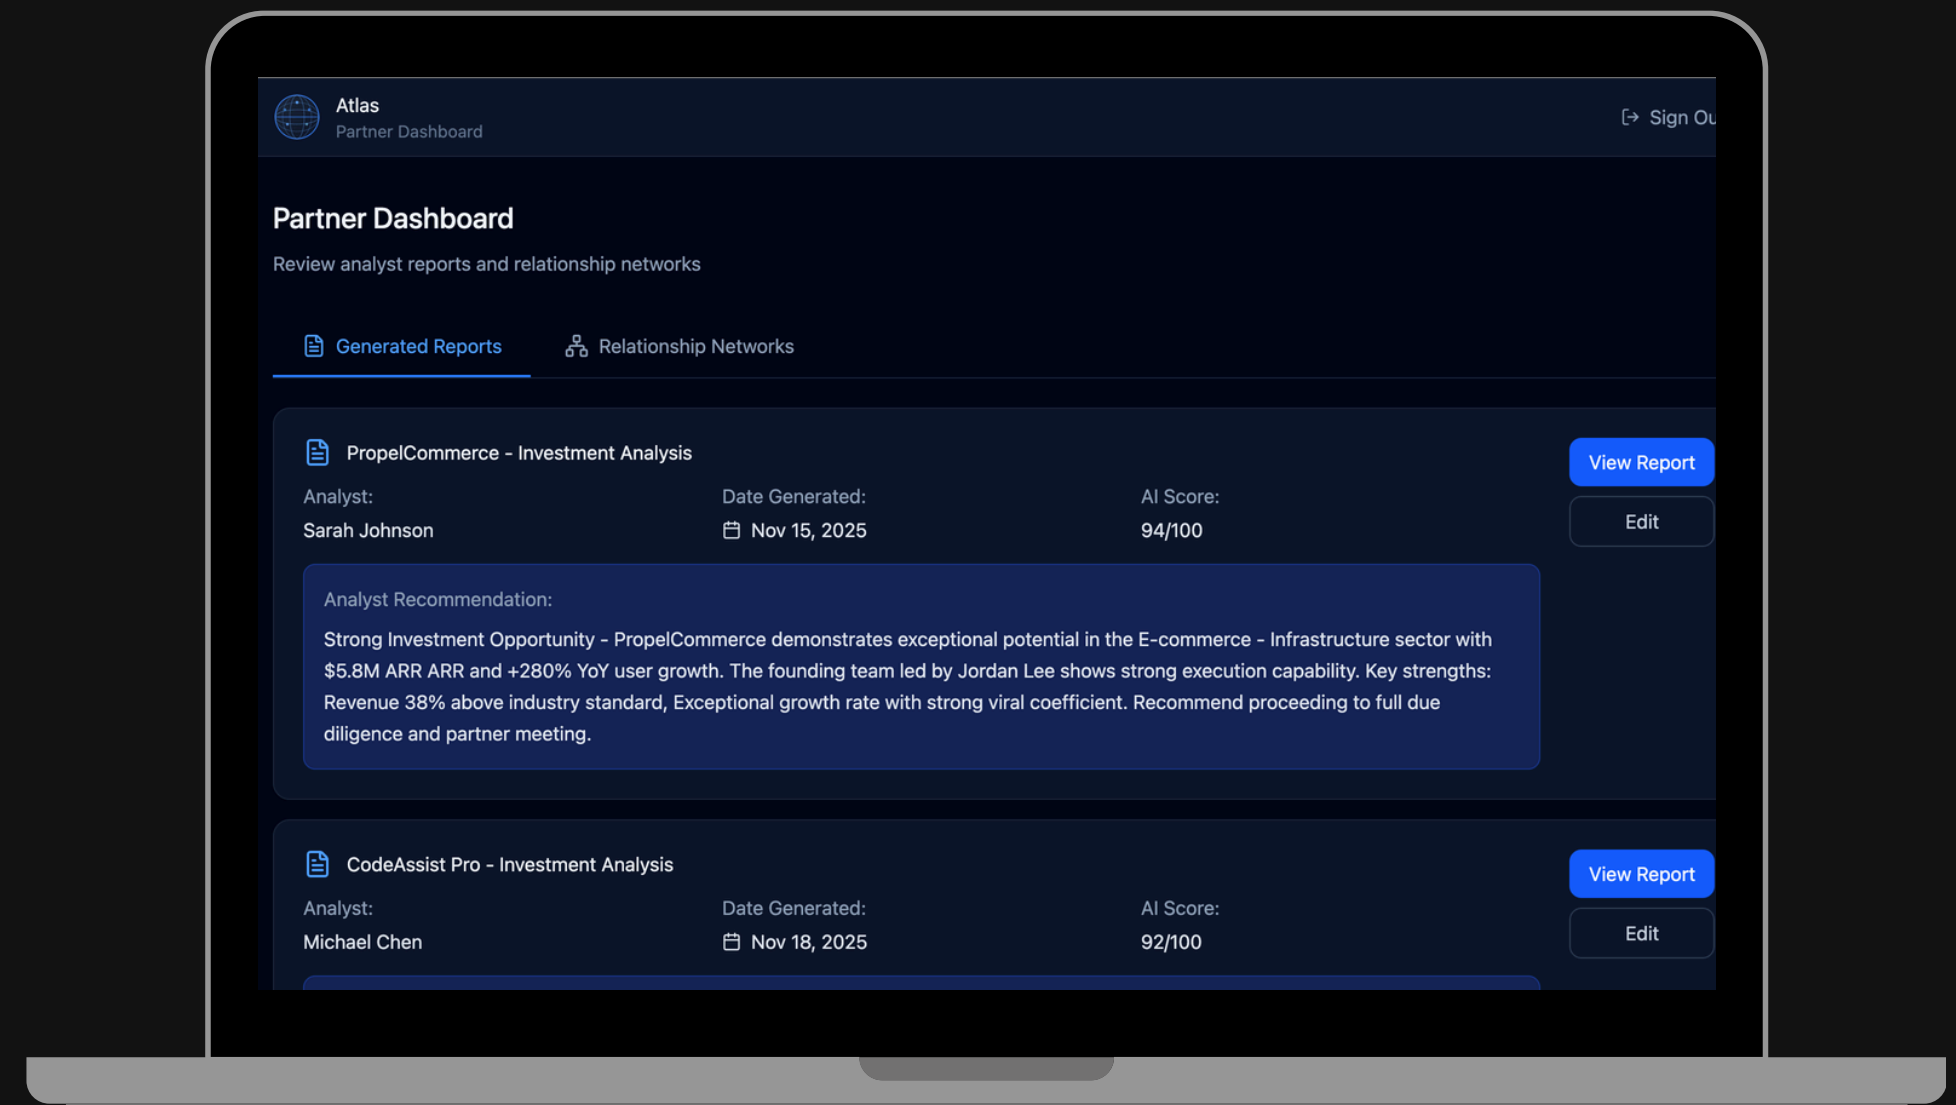

Atlas gives analysts a structured, focused workflow for evaluating startups.

- AI-Powered Analysis
- Report Generation & Editing
- One-Click Sharing to Partners
 - Relationship Maps
 - Notes & Context Layer

From the laptop of an **partner**...

Atlas gives partners a unified view of reports, founder signals, and real-time relationship maps— enabling faster, more confident decisions.

- Report Review
- Founder Signal Analysis
- Dedicated Relationship Map Tab
- Live Connection Updates

Atlas: one system that connects everything

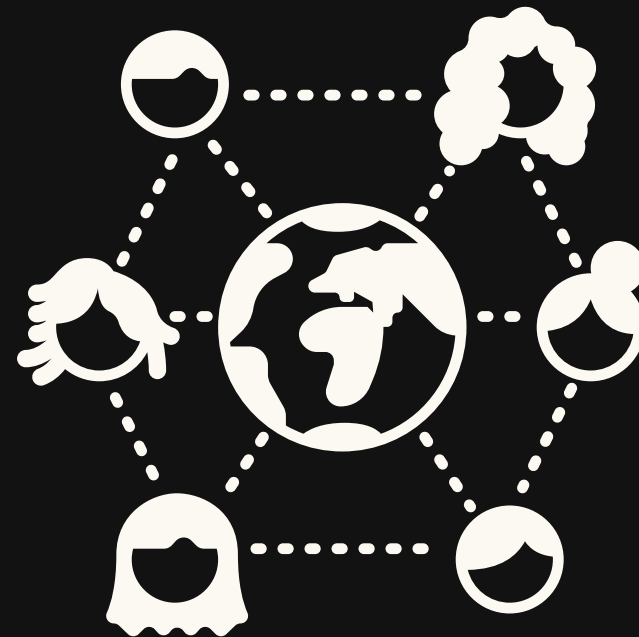

Agentic AI System

**Relationship
Mapping System**

**Scoring System for
Startups**

- Meeting Preparation & Briefing
- Email Tracking & Summarizing
- Record Updating & Management
- Notes Summary & Processing

High Potential

Median Potential

Low Potential

60 → 15 minutes *per startup*.

WITHOUT ATLAS

- manual email sorting
- read 20-page pitch deck
- google founders
- write memo from scratch
- guess which startups matter

WITH ATLAS

- AI auto-extracts data
- see key metrics instantly
- network map shows connections
- pre-filled report (edit only)
- AI prioritizes by score

TIME PER STARTUP:

60 minutes → 15 minutes

4x faster

REPORTS PER WEEK:

3-4 reports → 12-15 reports

3x output

Atlas doesn't replace analyst judgement – it amplifies it by removing the grunt work.

Realistic MVP: Analyst Experience First

Must Have (MVP Core)

1. Analyst Dashboard with card swipe
2. AI pitch deck parser & summarizer
3. Basic scoring (revenue & users)
4. Relationship map with manual editing
5. Report generator
6. Partner view

Phase 2 (Months 4-6)

- Email/calendar auto-import
- LinkedIn integration for network data
- Advanced AI scoring with custom weights
- Real-time collaboration on reports

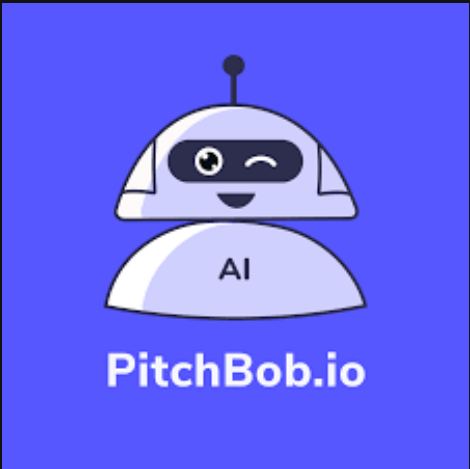

Future (Months 7-12)

- Automated web scraping for traction signals
- Mobile app for on-the-go reviews
- Portfolio company tracking
- LPs dashboard for fund performance
- Add Full Version History
- Build 12-Month Revenue Forecasting
- Strengthen Transparency

Impact over feature bloat

Why Atlas Wins

Integration vs Isolation

CAPABILITY
Document AI processing
Relationship mapping
Startup scoring
Real-time updates
Analyst-first design
Network-influenced scoring
